INTELIMAS BIOSCI

WHO WE ARE | INTELIMAS BIOSCI

Intelimas BioSci is an original equipment manufacturer of some of the medical and surgical devices that are indispensable parts of the healthcare ecosystem. Our manufacturing philosophy in developing clinician and patient-centric devices and solutions in addition to commodities is scalable capacity thoughtfully managed for flexibility while meeting stringent regulatory industry oversight and technical requirements.

We maintain warehousing and logistics capabilities facilitating up to 90 days inventory of products for nationwide distribution as well as to serve the requirements of New England regional clients, on-demand. We have forged strategic partnership with two of the largest industry distributors to execute delivery of our products into the marketplace at maximum cost and time efficiencies.

At the center of our corporate responsibility is our emphasis on regulatory compliance in the development and marketing of our products to promote the protection of clinicians and other healthcare workers as well as quality patient care.

WORKFORCE DIVERSITY

At all levels of our organization, we are committed to enriching the workplace through the pursuit of diversity in building a most skilled team of contributing professionals.

We subscribe to the view that the organization is strengthened by an engaged workforce that broadly resembles the communities we serve and for whom engagement within the context of cultural sensitivities is virtually second nature.

INTELIMAS BIOSCI

CAPABILITY STATEMENT

INTELIMAS BIOSCI is a medical and surgical device original equipment manufacturer (OEM). We focus on designing, developing and manufacturing innovative and high-quality medical devices for hospital systems, healthcare providers and medical professionals. Our company provides advanced solutions that improve patient outcomes, enhance surgical procedures and drive efficiency.

MISSION

Our mission is to positively impact the healthcare industry with competitively priced, cutting-edge proprietary and non-proprietary medical/surgical devices that improve patient care and enhance clinical outcomes.

INFRASTRUCTURE & QUALITY CONTROL

FDA certified New Hampshire warehouse for national distribution. Partnered with UL Solutions for production output spot testing to ensure quality standards & regulatory compliance.

ERP & INFOTECHNOLOGY

Acumatica - enterprise resource planning platform with suite of applications including financial management, customer relationship management (CRM), project accounting & distribution management tools - Help Desk Support

We are proud to be an equal opportunity & affirmative action employer. Including females, minorities, protected Veterans & those with disabilities.

INTELIMASBIOSCI

MEDICAL | SURGICAL DEVICES

As a medical device OEM, our capabilities include the design, engineering, and manufacturing of complete and component products utilized in support of healthcare systems. We are vigilant in developing and deploying the most innovative and advanced instrumentation and equipment to aid diagnostic and administration of therapeutic care to patients within the framework of quality, competitive pricing, and reliability.

The growing list of products (exclusive of unlisted commodities) for which the company has obtained regulatory approval for commerce in the US are as follows:

- Infusion Pump & Accessories
- Intravascular Fluid Administration Set
- Nasogastric Feeding Tubes and Esophageal Guide Wires
- Pneumatic Tourniquet & Accessories
- Disposable Procedure Trays
- Surgical Drape
- Surgical Gown
- Nitrile Disposable Examination Gloves

INTELIMAS SCI

LIFE SCIENCES | PHARMACEUTICAL

The evolution of generic biologics and ever deepening industry regulations have meant a challenging commercial environment for life science product manufacturing. Within this framework is our commitment to meet customer objectives and deliver efficiencies through thoughtful business alliances forged primarily with a leading United States – based injectable manufacturing works. In this regard, our core offering is generic pharmaceutical injectables.

Our American primary manufacturing works has decades of experience and allows us to elevate standards for responsiveness and reliability — benefits of a condensed supply chain. Jointly, we commit to seeking responsive and innovative approaches to meet market demand for injectables.

INTELIMASBIOSCI

FLEXIBLE | RESPONSIVE

Our functional verticals comprised of Med/Surgical Devices, Life Science/Biotech, and Warehousing/Logistics are strategically interconnected and maximize supply chain value.

RELIABILITY

Scale has been essential to ensuring a consistent and reliable supply of products. Multiple manufacturing sites yield annual production volume numbering in the tens of millions.

Expansion of our works roster to facilitate steady increase in output to meet projected growth in demand as well as creating production redundancies are company priorities. The continuous delivery of high value through quality standards, reliability, and an uninterrupted supply chain is the benchmark.

PACE & ELASTICITY

We truncate the timeline from manufacturing to therapeutic use through key alliances with continental US geopositioned works. The immediate benefit is to condense and simplify the supply chain with an added benefit of shiftability in operations to respond to market demands and help mitigate shortages, timely and with minimal effort

QUALITY

With careful adherence to manufacturing quality standards and process controls, a prerequisite of our manufacturing works is that they employ automated manufacturing lines that limit or eliminate human interaction in sterile filling areas. With an overlay of highly trained labor, the full roster of our works score statistically high in meeting the quality regimes of regulatory agencies worldwide.

INTELIMASBIOSCI

WAREHOUSING | LOGISTICS

Our main warehousing and fulfillment center is in Londonderry, New Hampshire within a five-mile radius of the Manchester-Boston Regional Airport. Our warehousing resources include the full range of storage, fulfillment, and shipping capabilities inclusive of unloading, receiving, and digitally tracking inbound/outbound goods, order picking and packing, and handling returns/exchanges. With the location comes seamless accessibility by international freight carriers and staging for the efficient movement of products to any destination.

TECHNOLOGY & AUTOMATION

Technology and automation are central to reliability and efficiency in our combined warehousing and logistics operations. The offering of tech-enabled operations for inbound, inventory tracking, and the outbound flow of products enhances speed, automation, visibility, and transparency and allows us to leverage our capabilities and enabling clients to monitor their supply chain.

ON-DEMAND

A distinct service offered within the New England region is our capacity to provide on-demand same-day delivery of certain products. We maintain a fleet of company vehicles to serve end to end consumer requirements and, through tactical coordination with regional consumers, endeavor to ensure appropriate levels of inventory of select products through allocating and dispatching GPS tracked rolling stock for the final delivery.
