## PROSTHETICS & ORTHOTICS

OUR PROMISE TO OUR PATIENTS

At Restorative Prosthetics & Orthotics, our mission is to set the bar for the delivery of physical rehabilitation and patient experience while restoring quality of life. It is our vision to change the narrative of healthcare by placing the patient first in every decision we make.

### WHY CHOOSE RESTORATIVE

- We are a local, full-service Prosthetics & Orthotics with offices across Middle Tennessee.
- Company-owned Fabrication Facilities (located in Chattanooga and Murfreesboro) allow us to efficiently create and deliver custom, state-of-the-art devices in-house and with top quality.

### OUR EXPERIENCED PRACTITIONERS

- Make hospital calls to see patients for pre & post operative-care including immediate post-operative prostheses & spinal support braces.
- Certified by The American Board for Certification in Orthotics, Prosthetics & Pediatrics
- Offer special expertise in high-tech microprocessor prosthetics
- Operate as full-service, full-time Prosthetic & Orthotic practices

### PATIENT FIRST APPROACH

*Our entire staff works with a level of empathy and expertise that you might not expect, but your patient fully deserves. Allow us to take care of your patient's needs while restoring their quality of life the Restorative way.*

## PROSTHETICS & ORTHOTICS

SUPPORTING OUR COMMUNITY

**Eric Kottner**

*Certified Peer Counselor*

*Eric is available 24/7 to visit patients or referral sources personally or talk with them over the phone. An amputee himself, Eric is an Amputee Peer Counselor of more than twenty years.*

---

Eric is trained and certified by the Amputee Coalition of America and estimates that he has had the honor of counseling upwards of 1200 amputees--and counting. Eric has had the privilege of starting or co-founding three Amputee Support Groups in Ft. Worth, TX, Orlando, FL and Pittsburgh, PA.

In addition, he started the Union Amputee/Celebrity Golf Tournament benefiting The Woodlands Foundation and the Diabetes Foundation in Pittsburgh. The Woodlands gives disabled children age 18 and under a place to go and safely enjoy the outdoors.

Eric is passionate about working with fellow amputees and will be available to our patients and their families to provide support when needed. In his free time, Eric plays golf and enjoys working out.

# RESTORATIVE

PROSTHETICS & ORTHOTICS

Home visits allow our prosthetists to observe you participating and completing the activities that you do and are important to you. Assessing these help us discover the right solution for you.

We take the experience that you would have at one of our sister companies' brick and mortar offices and bring it to the comfort of your home. Our experienced clinicians are certified by The American Board for Certification in Orthotics, Prosthetics & Pedorthics and have expertise with all levels of technology. From trusted products and techniques to proven cutting-edge advancements being used and developed today, this is what you receive when a Restorative Mobile Prosthetics' prosthetist comes to your home.

# RESTORATIVE

## PROSTHETICS & ORTHOTICS

PATIENTS OVER PROFITS

From the beginning, Restorative Prosthetics and Orthotics' president and owner, Aaron Sorensen, CPO, has been committed to keeping Restorative Prosthetics and Orthotics as a privately held Tennessee company. Not only is Sorensen the owner, he is also a clinician who sees and treats a full case-load of patients every day.

Many O&P companies are beholden to a corporate formulary that requires their clinicians to provide prostheses and orthoses based on profit margins rather than the patient's needs. That's not how we do business at Restorative.

We are not a publicly traded company nor are we owned by venture capitalists or a private equity firm. Therefore we do not answer to shareholders or financial drivers that maximize corporate profits. This allows us latitude that other prosthetic and orthotic companies do not have.

# RESTORATIVE PROSTHETICS & ORTHOTICS

PEDIATRIC PROSTHETICS

We have a long history of treating children with limb loss and limb differences, whether from a congenital defect, trauma, or disease progression. We work closely with our pediatric patients over time and have frequent check-ins to re-evaluate the effectiveness of their prosthetic solution as their bodies are constantly growing. We also understand that children's interest in extracurricular activities will be developing and changing during this exciting time in their lives. Their emotional responses to their prosthesis may vary along the way, so these ongoing assessments with our friendly clinicians is crucial to a child's overall quality of life.

## Full Array of Pediatric Prostheses

### Lower Extremity

- Partial Foot
- Transtibial
- Transfemoral
- Hip Disarticulation

### Upper Extremity

- Wrist Disarticulation
- Transradial
- Transhumeral
- Shoulder Disarticulation

All other types of upper and lower extremity prosthetics

# RESTORATIVE PROSTHETICS & ORTHOTICS

PEDIATRIC ORTHOTICS

At Restorative Prosthetics and Orthotics, our pediatric care philosophy is that kids should be treated like kids. Our clinicians are parents too and we take a child-centered approach to communication and treatment for our young patients.

We understand that the process of learning about and getting fitted for orthoses can be stressful for parents and children alike. That's why we make sure to allow extra time for pediatric patients and their families. We create a relaxing environment for consultations, treatments, and fittings and encourage open two-way communication throughout the entire process.

## Complete Array of Pediatric Orthoses

### Lower Extremity

- Hip
- Knee
- Foot and ankle

### Upper Extremity

- Hand
- Wrist-hand-finger
- Elbow

Children are not small adults. Our orthotic practices reflect the different needs of growing and developing kids. Our experienced practitioners are extensively trained in the techniques and methods needed to successfully meet the unique needs and expectations of our pediatric patients.

# RESTORATIVE PROSTHETICS & ORTHOTICS

PEDIATRIC CRANIAL & SPINAL

Restorative Prosthetics and Orthotics is equipped with a portable, state-of-the-art Starband Scanner created by the leader in cranial helmet technology - Orthomerica. We offer scans at any of our locations throughout Middle Tennessee and we can also come to your clinic to scan your patient. Many times this makes it easier on the family and patient to be in an environment that is comfortable and familiar.

## With this technology, we can:

- Capture the image with no casting needed
- Provide comprehensive print-outs that track the baby's progress
- Provide pre- and post-operative scans for craniosynostosis
- Create each patient a custom helmet that is easily modified as treatment progresses
- We can provide scans throughout the treatment to all you to monitor progression

## Scoliosis Orthotic Systems

Our practitioners are certified in a wide variety of scoliosis orthotic systems including night time only wearing systems. Our orthotists will help you choose the system that is best for treating curvature of the spine in this stage of a child's developmental path.

# RESTORATIVE PROSTHETICS & ORTHOTICS

PROSTHETICS

To us, the field of prosthetics is more than making limbs - it is a vital art form focused on helping our patients with limb loss restore their independence, mobility, and quality of life. They have unique needs and expectations when it comes to a new prosthesis, from their level of amputation and motor functions to durability, comfort, and the appearance that the patient prefers. That's why our Board Certified Prosthetics prosthetists crafts and fits a wide variety of upper and lower extremity prostheses customized to best align with the patient's lifestyle and goals.

## State-of-the-Art Prostheses Uniquely Designed for Every Patient

### Sockets

- Preparatory
- Definitive

### Feet

- Elastic Keel
- Multiaxial
- Dynamic Response
- Microprocessor Foot & Ankle

### Knees

- Manual Locking
- Weight Activated or Stance Control
- Power Knee
- Microprocessor Controlled

## Our Mission

*Setting the bar for the delivery of physical rehabilitation and patient experience while restoring quality of life.*

# RESTORATIVE PROSTHETICS & ORTHOTICS

ORTHOTICS

At Restorative Prosthetics & Orthotics, we provide orthotic care for pediatric, adult, and geriatric patients. We specialize in custom-made orthoses which are designed with precision to match the patient's body part through scanning, casting, or impressions.

We also offer premade orthotics which are frequently referred to as "off-the-shelf." Unlike our competition, our orthotists will take the time to customize and modify these pre-fabricated devices to properly fit the patient's body type for comfort and function.

## Lower Extremity Orthotics

(Custom Fabricated / Custom Fit)

- Foot Orthoses/shoe inserts
- Ankle-Foot Orthoses (AFOs)
- Knee, Ankle, Foot Orthoses (KAFOs)
- Knee Orthoses (KO)

## Spinal Orthotics

(Custom Fabricated / Custom Fit)

- Cervical Orthoses
- TLSOs
- Scoliosis Orthoses
- LSOs

## Upper Extremity Orthotics

(Custom Fabricated / Custom Fit)

- Finger Orthoses
- Wrist Hand Finger Orthoses
- Elbow Orthoses
- Shoulder Orthoses

# RESTORATIVE PROSTHETICS & ORTHOTICS

NURSING HOMES & REHABS

## On-Site Nursing Home and Rehabilitation P&O Services

Restorative makes prosthetic and orthotic services easy and accessible for  
you and your patients

### How it Works:

Schedule recurring visits to your facility for patients with new or chronic needs. We are a full-service P&O company and we fulfill the needs of new or existing prosthetic and/or orthotic patients.

With reoccurring visits, our clinicians are available to evaluate patients that have needs for new solutions and follow-up with patients that were previously seen and treated.

Scheduled visits allow for adjustments to be made on-site and eliminates the hassle of coordinating appointments and transportation to off-site appointment locations.

*Consult your RP&O representative for more information*

# RESTORATIVE PROSTHETICS & ORTHOTICS

WOUND CARE

Restorative Health Services Group is committed to being a partner in the multi-disciplinary approach to wound care management.

Our locations across Middle, Southeastern and Eastern Tennessee welcome the opportunity to partner with local and regional wound care clinics. One of our representatives would be happy to schedule an in-service to discuss how our orthotists/prosthetist can enhance your lower extremity wound care treatment or plan.

At RHSG, we use a variety of weight off-loading products including OrthoAmerica OWLS. OrthoAmerica has spent 10 years researching and developing their OWLS trademarked product line. The OWLS bracing system is designed to complement the ongoing therapies and post-operative care, correcting or accommodating the orthopedic anomaly that contributed to the wound(s). These off-loading products provide needed correction or accommodation for the fastest possible positive outcome.

## OrthoAmerica OWLS:

- WHO, Heel Relief
- WHO, Forefoot Relief
- Advanced Diabetic Orthosis
- WHO, Midfoot

## Traditional Orthotic Off-loading Solutions:

- Metal AFO with Calf Lacer Attached to Shoe
- Arizona Open Toe Walker
- Arizona Closed Toe Walker
- C.R.O.W. Boot

## Off-Loading Prosthetic Solutions

RHSG can provide off-loading solutions for patients that have had a previous amputation. This can be a strategic approach in getting insurance coverage for one or more of the following prostheses:

- Custom Partial Foot Prostheses
- Custom Molded Prosthetic Shoes
- Chopart/Lisfranc Prostheses
- Arizona Partial Foot Walker

## OrthoAmerica OWLS lite Heel, Midfoot or Forefoot Relief

The OWLS lite was designed to treat Wagner 0-1 plantar ulcers. It is an easy off-the-shelf solution to early developing wounds. The pneumatic bladder helps to reduce shear in the foot portion. The removable plantar sections are made from diabetic-friendly materials and are easily removable to create additional relief at the wound site. OWLS lite is the perfect alternative to orthopedic healing sandals.

OWLS lite designs are available in small to extra large sizes.

### Indications

- Designed to reduce pressure for Wagner 0 and 1 plantar pressure ulcers

### Features

- Pneumatic ankle bladder to reduce anterior shear motion and friction on the foot
- Removable plantar foot sections to allow specific and localized pressure reduction
- Neuropathic-friendly foams in the plantar foot section
- Off-the-shelf design to allow immediate fit in the clinic
- Easy donning and doffing

*Consult your Southeastern representative for more information*
